EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Adams on 24 June 2009.

In the claims:

Please add the following claims:

43. A method of assembling the sliding door according to claim 25, said method comprising the steps of: providing the outer door skin, the inner door skin, the door module support, the door inside trim and the cable guide assembly; assembling the sliding door with the door module support, the inner door skin and the door inside trim in such a manner that guide surfaces of the guide channel are formed or integrated at least in sections on at least one of the inner door skin, a door module support capable of being connected with the inner door skin and the door inside trim.
44. The method according to claim 43, wherein the cable guide assembly is provided pre-assembled and is attached to the door module support for accommodating the sliding door's functional units and wherein the door module support is attached together with the functional units and the cable guide assembly to the sliding door in such a manner that the guide channel for guiding the cable guide assembly is formed on moving the sliding door.

Art Unit: 3634

45. The method according to claim 43, wherein the guide channel is formed between the door module support and the inner door skin of the sliding door.

46. The method according to claim 43, wherein the guide channel is formed between the door module support and the door inside trim.

In the Specification:

In the second paragraph of the third page, delete the number "20" at the end of the first sentence and replace it with the number "19".

2. The following is an examiner's statement of reasons for allowance: The cable guide assembly is well known in the art, however, a cable guide assembly having two sections: one in a integrated guide channel of the door and a second section outside of the guide channel and to a direction transverse to the sliding plane is patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Jeff Tang at telephone number (571) 270-5223.
